(54) BAG FOR PERSONAL COMPUTER

(57)Abstract:

PROBLEM TO BE SOLVED: To easily watch a monitor and an original by housing a personal computer in a bag, opening a cover, stopping the cover on the back of monitor in a standing attitude while raising the monitor, and using the back also as an original platen.

SOLUTION: This bag has inner capacity for housing a lap top type personal computer 1, and its entire surface is covered with a cover 6 for opening/closing an opening part. The cover 6 is linked through a stopper 14 to a main body 4 of bag so as to be also used as an original platen 12 while stopping in the sanding attitude on the back of a monitor 1A in the state of opening and raising the monitor 1A of the computer 1. A holder 15 for the original is fixed on the inner surface of the cover 6, and a clumper 17 such as a clip for clamping and holding the upper end of original is fixed on a rod 16 to be horizontally laterally or vertically elongated. The vertical width of the main body 4 of bag is made wider than the longitudinal width of the computer 1 so that the cover 6 to be also used as the original platen 12 in the state of opening the lid 6 can be protruded upward from the monitor 1A of the computer 1, and impulse for the computer 1 to fall down is absorbed by a lower cushioning member 20.
